CNC Turning Centers

DX Series

CNC Turning Center

OVERVIEW

Jyoti introduces, DX Series for revolution in turning center technology. With this we build a world class machine that delivers exceptional performance even in Hard Part Machining. DX Series machines with Monoblock 45° slant bed structure offers advanced rigidity and durability which proves to be a value for money. This series is a benchmark in terms of power, torque, precision and accuracy, being fully capable to work with higher load carrying capacity. A design is flexible enough to blend with many forms of productivity improvement options. This series can also entertain complex jobs with cost effective solutions offering better tool life.

MONOBLOCK STRUCTURE

The rigid single piece 45° slant bed is made out of high grade cast iron for better rigidity, ability to take heavier cuts and faster production. With virtually no vibration, even at higher diameter enables superior surface finish even on hard materials.

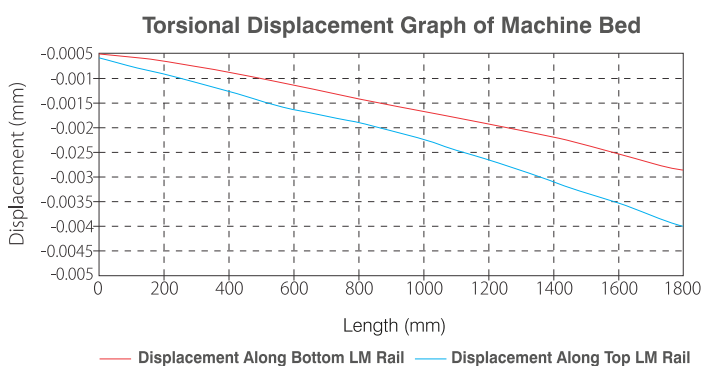

HEAD STOCK

Taking into consideration ability to sustain the heavy cutting loads, head stock is made out of closed grain FG 300 grade casting. Fins are provided with better surface area for proper heat dissipation enabling better spindle life.

*Structure of DX 250

BED TORSION RIGIDITY

3 - POINT LEVELING

Twisting effect of bed can be eliminated due to 3-point leveling. Quick installation and relocation made easy with this feature.

POWERFUL SPINDLE

Machine spindle is manufactured in-house with the help of world class precision mother machineries and assembled in a dust free temperature controlled environment.

Spindle is housed with super precision 4 angular contact bearings in the front and 2 angular contact bearings at the rear end for A₂8 spindle. In A₂11 Spindle the design is with 1 cylindrical roller bearings + 2 angular contact bearings at the front and 1 cylindrical roller bearing at the rear for efficient working. This arrangement takes care of radial as well as axial loads. Powerful spindle with High Torque Motor allow high material removal rate.

LINEAR AXIS

Machines are fully capable to take higher cutting parameters even with hard turning materials thanks to wide Linear Motion (Roller type) Guideways, Preloaded direct coupled ball-screws and Monoblock Structure.

RIGID SERVO TURRET

DX Series machines are equipped with high speed and high precision Bi-directional Servo Turret with hydraulic clamping system achieved by 3-piece hirth coupling.

TAIL STOCK

A manually movable tailstock with hydraulically actuated quill is a standard feature of the machine. Programmable tailstock with hydraulic movement is offered as an option.

DX Series

CNC Turning Center

ERGONOMIC DESIGN

The newly designed Easy-to-Operate operating panel of the machine is made considering the human comfort and the operator friendliness.

EFFICIENT CHIP DISPOSAL

Ergonomically designed concept of DX Series enables to give efficient chip disposal system via chip tray. In case of applications with higher material removal rates or applications requiring long un-interrupted cutting, chip conveyor can be opted for better productivity.

TURN MILL CENTER (OPTIONAL)

LIVE TOOL TURRET

VDI or BMT Standard servo driven 12 station live tool turret on Turn Mill Centers allows mix and match of the static or powered tools. Turret movement is controlled by servo motor for various milling applications.

HEAD STOCK WITH C-AXIS

TMC Available with hydraulically operated disc brake for C-Axis which is helpful for milling operations like PCD Drilling and Tapping, OD & ID profiles with Radial and Axial Live tools.

PRODUCTIVITY IMPROVING OPTIONS

HYDRAULIC STEADY REST

Machine can be equipped with hydraulic steady rest for smooth machining operation for over-hang work pieces as per required applications.

AUTOMATIC TOOL SETTING

Automatic Tool Setting Probes and Job Probe can be incorporated with control feedback to set accurate tool data and even detect in-process tool wear or breakages.

GEARBOX

Auto Shifting 2-Speed Gearbox can be chosen for applications requiring high cutting force for hard material or high cutting speed for softer materials providing high cutting torque at lower rpm.

* Depends upon clamping arrangement, Tooling and Job. # Refer Machine Detailed Layout for overall machine dimensions & space requirements. - Step-up structure for DX 250/500

** Bar Capacity - Depends on appropriate clamping between chuck and cylinder as well as make of chuck

CONTROL SYSTEM

The CNC System offered with the DX Series machine is the latest digital control from FANUC 0i TF Plus and SIEMEN S 828D

STANDARD FEATURES

- AC Spindle Drive
- AC SERVO Digital Drive
- Monoblock Structure
- 8-Station Bi-Directional Servo Turret
- L. M. Guideways (Roller Type)
- Hyd. Chucking
- Auto & Manual Coolant System
- Centralised & Programmable Lubrication
- Laser Calibrated Axis for Highly Precise Positioning Accuracy and Repeatability
- Electricals with Quality Devices & Panel with A. C.
- Tailstock with Hyd. Quill

PRODUCTIVITY IMPROVING OPTIONS

- Industry 4.0 Complied with 7th Sense
- Chip Conveyor
- Two Speed Gear Box
- Beta P-Series Motor for Fanuc
- Large Spindle Bore
- Programmable Tailstock
- Digital Tailstock
- 12 Station Turret
- Steady Rest
- Bar Feeder
- Auto Door
- Bar Puller
- Part Catcher
- Live Quill (Built-in Revolving Center)
- High Pressure Coolant Through Turret
- Gantry / Robot Interfacing
- Hydraulic Collet Chuck
- Manual Guide Oi (Fanuc)
- Shop Turn (Siemens)
- Easy SMS System (Siemens)
- Fully Toolled up Solution to Meet Customer Needs
